

Working group 1: Moderators of outcome

Nicosia
September 14, 2018

UNIVERSITY OF COPENHAGEN

Members

Austria	Henriette Löffler-Stastka
Croatia	Tamara Prevendar
Denmark	Stig Poulsen
Finland	Vera Gergov
Greece	Eleni Vousoura
Italy	Giuseppe Chiarenza
fyR Macedonia	Silvana Markovska
Malta	Nigel Camilleri
Malta	Andrea Saliba
Norway	Randi Ulberg
Portugal	Sandra Torres
Romania	Bogdan Tudor Tulbure
Spain	Gema Fuentes
Spain	Luis Joaquin Garcia-Lopez
Switzerland	Martin Debbané

Status

- Overall aim to perform systematic literature reviews of moderators (interaction between baseline variable and treatment) and non-specific predictors of outcome
- Strategy:
 - Combining searches for:
 - Specific diagnostic groups (Anxiety disorders, Depressive disorders, Bipolar and related disorders, Psychotic disorders, Eating disorders, Personality disorders, Substance-related and addictive disorders, Autism spectrum disorders, ADHD, and Conduct disorders)
 - A comprehensive list of psychotherapies
 - A wide range of designs (both RCT's and non-controlled, naturalistic studies)
 - Adolescents and young adults (14-30 years of age)
 - Not searching specifically for predictors / moderators

Status

- We have, thanks to Vera and Eleni, completed all searches and will at this meeting begin the process of in- and excluding the references following principles formulated by Bogdan and Vera
- Work to be done in the following groups (membership not quite fixed):
 - Anxiety disorders (Luís Joaquin, Tamara and Bogdan)
 - Mood disorders (Eleni, Nigel and Randi)
 - Psychotic disorders (Vera and Henriette)
 - Eating disorders (Stig and Sandra)
 - Personality disorders (Martin, Tamara and Henriette)
 - Substance-related and addictive disorders (Nigel and Eleni)
 - Autism Spectrum Disorders (Andrea)
 - Attention deficit hyperactivity disorder (ADHD) (Martin and Silvana)
 - Conduct disorders and ODD (Silvana and Giuseppe)
